

Cures which can be administered during the racing season for old and young birds. Also for preparation of breeding pigeons!

Medical Combination Cure

Adeno-Coli-Mix 5g + TKK / Tricho-Groen 5g + Fungi 5g + Matrix 5g (1 sachet) + TOLLYAMIN FOR 30ml + DOSTO 15ml = 3 litres water

Preventive, natural health cure

In case the Combination Cure does not work with an aggressive form of young birds sickness, add Bacterial-MegaOil over the feed.

15ml + 20ml + 15ml + 1ml = 3 litres water

20ml on 1kg feed

Original SEDOCHOL PLUS from Merial for racing pigeons

Our Vision - Your Future

Merial is one of the leading veterinary pharmaceutical companies worldwide. The vision of Merial is to provide products that promote health and performance in animals.

The composition of the original **SEDOCHOL** had to be amended as a result of changes in the Animal Nutrition legislation.

This change in composition obviously took time, even for a leading veterinary pharmaceutical company. Our demands for the highest quality left no room for anything but perfection. Good is not good enough.

MERIAL strive for constant improvement and it is against this background that new **SEDOCHOL PLUS** has been developed specifically for racing pigeons.

MERIAL had noticed (not unsurprisingly) that a number of plagiarised products of **SEDOCHOL** were in circulation. **SEDOCHOL** is a copyright brand name of **MERIAL** and copies on the market will not be tolerated.

Vet. Schroeder+Tollisan B.V. are responsible for the distribution of **SEDOCHOL PLUS**. Perseverance and communication have been key factors in the success of this partnership.

The new **SEDOCHOL PLUS** is a product that can be used during moulting, racing and breeding. A number of top Dutch and Belgian fanciers were regular users of **SEDOCHOL**, also several German fanciers added **SEDOCHOL** to the water of their pigeons after a race for regeneration.

Why **PLUS**? The tried and tested composition (methionine + choline) has been supplemented with vitamin B12 and Vitamin B2. An additional plus for your pigeons.

Sedochol® Plus supplementary animal feed for pigeons. Administration is recommended to bring pigeons into racing condition, after a race or heavy exertion for quicker recuperation and during the moult.

Instructions during racing, moulting and breeding: daily dose = 10 ml per litre of drinking water. The solution should be prepared fresh daily. **Composition** (feed): Sorbitol 70%* - sorbitol (E420): 546 g / l (* non crystalizable liquid, ie D-glucitol: 468 g); sodium chloride and magnesium sulfate; water q.s. **Additives:** Choline Bitartrate - Choline: 61.4 g / l (vitamins and provitamins); Vitamin B2 - riboflavin-5'-phosphate ester, monosodium salt: 40 mg / l (vitamins and provitamins); Vitamin B12 - cyanocobalamin: 20 mg / l (vitamins and provitamins); DL-methionine - methionine: 10 g / l (amino acids, their salts and analogues); sorbic acid (E200) and L-tartaric acid (E334) (preservatives).

Analysis: Crude protein 4.6%; crude fat 0.14%; crude ash 0.2%; crude fiber 0.5%; moisture content of 40.0%; % sodium 0.03; 0.01% magnesium; sulfur 0.2%; lysine 0.0%; methionine 1%.

Storage: Store in the dark. Keep out of the reach of children. Responsible: Merial Belgium NV Culliganlaan 1C, 1831 Diegem: aBE100717. hr280912.
